PROFESSIONAL SUMMARY

Product-oriented Frontend Engineer with 3+ years of experience building scalable, user-centered web applications for cybersecurity and SaaS environments. Combines frontend engineering (React, TypeScript, Next.js), UX/UI design (Figma), and product thinking to own features end to end, from discovery to delivery. Experienced in translating business requirements into intuitive interfaces and improving user experience through data-driven decisions. Background in Industrial Design and 11+ years of teaching experience, contributing strong communication, problem-solving, and user-empathy skills.

PROFESSIONAL EXPERIENCE

Frontend Engineer & UX/UI Designer

Aug 2023 – Present

Metabase Q — Cybersecurity SaaS | Remote

- Own the end-to-end frontend experience of key product features, from UX definition in Figma to implementation in React and TypeScript.
- Develop high-performance, responsive interfaces with React, Tailwind CSS, and Material UI across multiple product modules.
- Design and maintain a scalable design system in Figma, standardizing components and improving UI consistency across the platform.
- Collaborate with product managers and engineers to define requirements, user flows, and technical constraints.
- Improve usability and accessibility across multiple modules, reducing user friction and support requests.
- Contribute to product discussions, feature prioritization, and UX decision-making.
- Bridge design and engineering, reducing implementation friction and shortening iteration cycles for feature delivery.

Frontend Developer (Freelance)

Apr 2023 – May 2023

TMS Ingeniería | Argentina

- Designed and developed a responsive corporate website for an engineering consultancy using React, Redux, and Material UI.
- Implemented smooth navigation and interactive UI experiences, improving engagement and perceived performance.

Full Stack Teaching Assistant

Feb 2023 – Jun 2023

Henry Bootcamp | Remote, Argentina

- Mentored full-stack students (JavaScript, React, Node.js, Express, PostgreSQL) through pair programming and group problem-solving sessions.
- Improved student performance and project completion rates through structured technical guidance and code reviews.

Technical Teacher

2015 – Present

EEST N.º 1 | Argentina

- Teach programming fundamentals, logic, and technical tools to technical secondary school students.
- Design curriculum content and hands-on, project-based workshops that foster analytical thinking and problem solving.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Tailwind CSS, Material UI, Bootstrap

Backend (working knowledge): Node.js, Express, REST APIs, PostgreSQL, MongoDB

UX/UI & Design: Figma, Adobe XD, Design Systems, Wireframing, Prototyping, Photoshop, Illustrator, CorelDRAW

Tools & Workflow: Git, GitHub, Jira, Confluence, Agile/Scrum, Slack

CORE COMPETENCIES

Product Thinking · Frontend Architecture · Design Systems · Usability & Accessibility · Cross-functional Collaboration · Communication & Mentoring

EDUCATION

Full Stack Web Developer — Henry Bootcamp

Industrial Designer — Universidad Nacional de La Plata (UNLP)

Technical Degree in Informatics — EEST N.º 3

LANGUAGES

Spanish: Native | English: B2/C1 (professional working proficiency) | French: A1 (basic)
